DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a process for preparing (2-oxo-1,3-dioxolan-4-yl) methyl methacrylate.

Group II, claim(s) 9, drawn to use of (2-oxo-1,3-dioxolan-4-yl) methyl methacrylate as a crosslinker in adhesives and coating materials.

Group III, claim(s) 10, drawn to use of (2-oxo-1,3-dioxolan-4-yl) methyl methacrylate as a battery electrolyte.

Group IV, claim(s) 11, drawn to use of (2-oxo-1,3-dioxolan-4-yl) methyl methacrylate in extrusion resins.

Group V, claim(s) 12, drawn to use of (2-oxo-1,3-dioxolan-4-yl) methyl methacrylate for metal extraction.

For the purpose of the lack of unity finding, use claims 9-12 are treated as method claims. Should applicant amend the said claims to read as product claims wherein the product is (2-oxo-1,3-dioxolan-4-yl) methyl methacrylate, claims 9-12 will be rejoined in a single group.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature linking the inventions together is the (2-oxo-1,3-dioxolan-4-yl) methyl methacrylate. The said methacrylate fails to meet the requirements of special technical feature as it has been disclosed in prior art (US 4,767,620; column 2, lines 24-25).

Telephone election not made

A telephone call was made to Surinder Sachar on 9/5/07 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
